The AI PhD course catalog

A library of AI courses, taught live by an AI instructor, for one payment.

18 courses in five schools. 1 of 18 open on Oct 30, 2026; the rest open in the monthly drops, and every one is included in one payment. Sol, an AI, teaches every lesson. It says so when you first meet it, and the label beside its name says so on every message.

School of Foundations

What AI is, how to talk to it, and how to use it every day. Start here if you are new to AI.

AI for Beginners: Start From Zero

Opens in a monthly drop

Beginner · 1.5 hours · 8 lessons

You can explain what AI is, use it for three everyday jobs, and spot when it is making something up.

AI Prompts That Actually Work

Open today

Beginner · 1.3 hours · 10 lessons

You write prompts that get a usable answer more often, fix the answers that miss, and keep a library of your own.

School of AI at Work

How to use AI on the work you already do, in general and for one kind of job: business, marketing, sales, teaching and real estate.

How to Use ChatGPT and Claude at Work

Opens in a monthly drop

Beginner · 2.5 hours · 12 lessons

You hand your assistant the email, summary and planning work that eats your week, and you check what comes back.

AI for Business: Save Hours Every Week

Opens in a monthly drop

Beginner · 2.5 hours · 10 lessons

You find the three jobs in your business AI can take over this month, and you set up the first one.

AI for Marketing

Opens in a monthly drop

Beginner · 2 hours · 8 lessons

You plan, draft and test a month of marketing with AI, in your own brand's voice.

AI for Sales: Automate Your Follow-Ups

Opens in a monthly drop

Beginner · 2 hours · 8 lessons

You cut the time on follow-ups, call notes and prospect research, without pasting client data where your company forbids it.

AI for Teachers

Opens in a monthly drop

Beginner · 2 hours · 8 lessons

You plan lessons and make materials faster, and you set a clear AI policy for your class.

AI for Real Estate Agents

Opens in a monthly drop

Beginner · 1.5 hours · 8 lessons

You write listings, client updates and market summaries faster, and keep fair housing rules in front of every draft.

School of Building with AI

How to build things of your own with AI: an assistant, agents, an app, a chat over your own documents, and AI that runs on your own computer.

Build Your Own Personal AI Assistant

Opens in a monthly drop

Beginner · 2.5 hours · 10 lessons

You build an assistant that does one job your way, test it here, and set it up in the AI you already use.

AI Agents and Automation for Beginners

Opens in a monthly drop

Beginner · 3 hours · 12 lessons

You build an agent that runs a weekly job on its own and checks its own work.

Vibe Coding: Build an App by Talking to AI

Opens in a monthly drop

Beginner · 3 hours · 12 lessons

You describe a small app in plain words and finish with one that works, without writing code yourself.

Chat With Your Documents: RAG Made Simple

Opens in a monthly drop

Intermediate · 2.5 hours · 10 lessons

You set up AI that answers from your own documents and shows where each answer came from.

Local LLM: Run AI Privately on Your Own Computer

Opens in a monthly drop

Intermediate · 2 hours · 8 lessons

You run an AI model on your own computer, offline, and know what it can and cannot do there.

School of Creative AI

How to make images, video, voice and music with AI.

AI Image Generator: From First Prompt to Pro

Opens in a monthly drop

Beginner · 2 hours · 10 lessons

You make images that look like what you pictured, and you know what you may and may not do with them.

AI Video Generator: Make Your First Video

Opens in a monthly drop

Beginner · 2 hours · 8 lessons

You make a short video from a script and pictures, and label it honestly.

AI Music Generator and AI Voice-Overs

Opens in a monthly drop

Beginner · 1.5 hours · 8 lessons

You make a voice-over and a short track, and know whose voice you may never copy.

School of Advanced Study

How AI works, from the basics of machine learning to using it safely and fairly.

AI Safety and Ethics: Use AI Responsibly

Opens in a monthly drop

Beginner · 1.5 hours · 8 lessons

You know what AI gets wrong, what never to share with it, and how to decide when it should not be used.

Machine Learning Course: The Fundamentals

Opens in a monthly drop

Intermediate · 4 hours · 14 lessons

You understand how models learn from data, train a small one yourself, and read an AI headline critically.
